**Subject:** RE: NOV Conference

Thank you for the follow-up Sabrina. As we have studied the information provided in more detail, we noticed the following differences in the data provided for the four dates included in the NOV:

11/3/2015

- The larger photos begin at 5:04 p.m. and end at 6:09 p.m.
- We have identified a total of 261 distinct images numbered from 864-1124
- The smaller photos showing the location of the observations include only 24 images numbered from 914-937
- There is an index of the digital image numbers that includes an opacity value for each image, and what appear to be 6-min. average values after every 24<sup>th</sup> image

11/24/2015

- The larger photos begin at 3:58 p.m. and end at 4:39 p.m.
- We have identified a total of 144 distinct images numbered from 1149-1292
- The smaller photos showing the location of the observations include only 24 images numbered from 1252-1275
- There is an index of the digital image numbers that includes an opacity value for each image, and what appear to be 6-min. average values after every 24<sup>th</sup> image

12/17/2015

- The larger photos begin at 3:54 p.m. and end at 4:27 p.m.
- We have identified a total of 129 distinct images
- There are no smaller photos indicating the location of the observations
- There is no index of images that includes opacity values

4/5/2016

- The larger photos begin at 10:15-10:22 a.m., include the period from 12:22-13:04 p.m., and end at 5:11 p.m.
- We have identified a total of 94 distinct images
- There are no smaller photos indicating the location of the observations
- There is no index of images that includes opacity values

If you could check on the availability of the smaller photos, and the indices for the Alt Method 082 photographs on the latter two dates, we would appreciate it.

I will see if we have any better luck enlarging the images provided to us.

---

Janet,

We were able to contact Virtual Technology. VT explained we should be able to click on the images and view a slightly larger, slightly better quality image. However, we have not had success doing so. Perhaps you will. But, beyond that, we are unable to obtain larger images at this time. Take another look at the boxes in the images, coupled with the actual full images we provided in response to the FOIA, and together they should allow a reasonable analysis on where the readings were taken.

Look forward to talking with you later in the week, Sabrina
